

SiSiB[®] PC8228

- 1 -

Diphenylsilanediol

Typical Physical Properties

Chemical Name	Diphenylsilanediol Diphenyldihydroxysilane
Empirical Formula	C ₁₂ H ₁₂ O ₂ Si
Molecular Weight	216.31
Color and Appearance	White powder
Density _{25°C}	0.99
Melting Point	> 140°C
Flash Point	53°C
CAS No.	947-42-2
EINECS No.	213-427-4
Purity	Min 98.0%

Note

Stable. Combustible. Incompatible with strong oxidizing agents.

Application

Anti-structuring additive for silicone elastomers.

Silicone intermediate.
